

## Overview

AVKITS were launched as a result of repeated interest in specific devices from Law Enforcement and Investigators.

Each AVKIT comprises of tried and tested solutions which have continually proven to be effective for Investigators.

Each delivery set of audio and video devices is complimented with a 1TB Capturra SmartDrive which can be used for automatic offloading of files from the audio & video devices.

Capturra 1TB SmartDrive's have intuitive software built in which can automatically duplicate images and videos from any device.

Each AVKIT delivery set is housed and protected inside a Pelican case, all tools are secured inside the case with a cushioning system.

## Dual Function – Digital Sweep Kit Images & Video

Capturra can also be used independently for digital sweeps and provides users with an extremely effective and easy way of processing a device for images and video, automatically duplicate all images and video off virtually any digital device., the duplication process leaves no trace on the target device and users can store 200k images or over 100 hours of video.

Capturra SmartDrive is compatible with virtually any digital device, if a device can be connected to a computer and display its drives, the Capturra will be compatible.
