

Overview

Capturra Action Drive is an automatic processing solution which can save Investigators lots of time when working with video and photo files.

Image and video content is an Investigators bread and butter and handling such evidence can sometimes take time due to offloading data from one system to another.

Other obstacles can naturally occur when an Investigator is handling multiple Investigations .

Investigators who use the Capturra kit can process their evidence off a surveillance tool immediately after the assignment, offloading the data using the Capturra kit is an automatic process and free's up important space on the storage drives of your surveillance tools.

Avoid downtime and implement procedures to optimize your time and that of your resources.

Dual Use Kit

Use the Capturra Software on the 1TB drive to perform Image and video investigations.

Deploy the Capturra drive on virtually any computer or smartphone and automatically process the target device for photos and videos.

The Capturra 1TB drive can be deployed on any computer, cellphone or any device which stores multimedia content which can mount onto a computer.

Once Capturra is pointed towards the target device it will scour not only multimedia storage files but all of the applications which have any type of multimedia directory on the device.

Multimedia directories are onboard most social media applications. Internet cache files also store multimedia files and Capturra can record and duplicate the content from these types of files and many more.

Extremely easy to use and very useful tool for digital audits.

Cellphone Investigations

Capturra Software is especially useful for Cell Phone image and video investigations.

Cell Phones store images and videos across multiple directories and the Capturra Software is the most thorough tool for searching a cell phone..

Duplicate a devices content automatically and have a complete backup of a device's multimedia footprint on the Capturra drive.

Capturra Software leaves no trace of duplication on the target device

Features

- Portable Automatic Evidence Processing and Storage
- Instantly offload important evidence from storage drives and Surveillance tools
- Never duplicates Content
- Cold Storage Solution for high value evidence collection and storage
- Backup Multiple devices with one Capturra Action Drive
- Perform Digital Sweeps using the Action Drive
- Dual use system designed for Investigators
- Process virtually any Digital device including iPhone and Android smartphones and tablets.

What's Included

- Capturra Action Drive 1TB External USB Drive
- USB 3.0 Card Reader
- OTG Adapter Kit
- Hard Shell Carrying Case
